

BREAKTHROUGH WOMEN

IN SCIENCE & MEDICINE

FEATURE STORIES

The Breakthrough Women in Science and Medicine series features three women from Northwell Health's Feinstein Institutes for Medical Research. These scientists have focused their breakthrough research on important clinical issues such as understanding biological disparities in cancer, women's health issues, such as postpartum depression, and the debilitating condition of endometriosis.

AWSM Women

ADVANCING WOMEN IN SCIENCE AND MEDICINE

This non-profit documentary-style biography series celebrates the contributions of women in the field of science and medicine. This series reaches millions of viewers through distribution to Public Television affiliates nationwide, inside the classrooms of 70,000 U.S. Schools, in the media centers of 26,000 Libraries, and licensed to 100 local cable channels. Your philanthropic underwriting of this episode sends a powerful message that your organization is committed to supporting women in STEM and their research. Your support also provides critical bridge funding to these scientists, through Advancing Women in Science and Medicine (AWSM) awards, to continue their ongoing research projects. The AWSM research grant awards will be named in honor of your company at the annual AWSM Awards Luncheon in New York City.
